

MMHCC Newsletter Summer 2005

MouseLine

Are your cancer models in the good company of the 300 mouse and rat models residing in the MMHCC's Cancer Models Database? In this database, you'll find in-depth information for over 70 mammary gland cancer models, 80 digestive system cancer models, 23 prostate cancer models as well as models of cancers of cardiovascular, nervous, respiratory, and female reproductive systems.

Summer is a great time to visit this database! Start entering and announcing your new models in this scientific community-wide resource - here's the link to get you started:

Repository News - Last Call

The following strains will be maintained as live colonies until the end of September 2005. After this date, they will be supplied as cryopreserved embryos. If you foresee using one of these strains in the near future, order now! Please be aware that all necessary paperwork (order form, MTA, etc.) needs to be completed and received by the Repository before the end of September in order to receive live mice.
